

	AI Roles	Teachers' notes
Brisk Teaching	<p>It is a powerful AI assistant designed specifically for teachers. It integrates directly into your browser (especially Google Docs and Google Classroom) and supports lesson planning, material creation, and feedback. It can be used to:</p> <ul style="list-style-type: none">• generate lesson plans aligned with objectives• create quizzes, worksheets, and comprehension questions from any text or webpage• adjust reading levels instantly• scaffold texts for different proficiency levels• create vocabulary lists and practice activities• generate speaking and writing prompts• provide instant feedback on student writing• suggest improvements for grammar, clarity, and organization• differentiate tasks for mixed-ability classes• create exit tickets and formative assessment questions	<p>My advice for those who use Brisk, as well as other AI tools, is that:</p> <ul style="list-style-type: none">• Always review generated worksheets and questions for accuracy and level appropriateness.• Be specific in your prompts (e.g., “Grade 8 EFL students, CEFR A2, 45-minute lesson”).• Use it to support differentiation, especially in large or mixed-level classes.• Avoid over-relying on instant feedback — teacher judgment is still essential.• Revise AI-generated examples to better match your students’ context.
