

### AI Tool for Engagement and Motivation

	AI Roles	Teachers' Notes
<b>Suno ai</b>	<ul style="list-style-type: none"><li>• Creates original songs for different lessons</li><li>• Creates songs in different languages</li></ul>	<ul style="list-style-type: none"><li>• Highly engaging for teenagers and young learners. But can be used for all ages</li><li>• Choose music genres carefully so that the lyrics remain clear and students can easily follow along, as some styles may be too loud or fast and can make the language difficult to hear and understand</li><li>• Excellent for teaching grammar patterns through repetition.</li><li>• Helps reduce anxiety in language learning.</li><li>• Not specifically designed for educators, prompts must be carefully structured.</li><li>• Lyrics generated by Suno may need editing to ensure accuracy.</li><li>• Works best when paired with tasks (gap-fill, grammar spotting).</li><li>• Particularly powerful in multilingual classrooms to build confidence and motivation.</li><li>• Can create songs in different languages</li><li>• The free version gives you many credits to create songs per day.</li></ul>
