

TIRF AI Show & Tell: ManusAI_Review Card_Dao Xuan Phuong Trang

Tool Name	AI Roles	Teachers' notes
Manus AI	• Conducting multi-step research and information gathering. • Summarizing information from multiple online sources. • Drafting reports, presentations, lesson plans, and other documents. • Assisting with web-based research, document analysis, and routine administrative tasks. • Supporting complex workflows that require multiple sequential steps.	• The quality of the output depends on the clarity of the prompt and the availability of reliable online sources. • Always verify factual claims, references, and citations before using the output for teaching or research. • AI-generated content should be treated as a starting point rather than a finished product. • May not perform well with highly specialized topics or information that is not publicly available online. • Human judgment remains essential when making academic or professional decisions.
