Group Study track

If you are a coordinator or head teacher you can use the guidance below to facilitate a professional development discussion after watching the video.

<https://youtu.be/liBWtcVrKlo?si=szcw19a0jv13Jy9y>

#### 1. Promoting Agency

How can we shift from "teacher-led prompts" to "student-designed inquiries" in our specific curriculum?

#### 2. Digital Literacy Scaffolding

What step-by-step instructions (like the Google Translate trick) do our students need to successfully use AI as a language partner?

#### 3. Handling Glitches

Raquel showed a moment where the AI didn't catch her voice. How should we prepare students to troubleshoot AI "misunderstandings"?

#### 4. The Human-in-the-Loop

How do we balance AI feedback (grammar tips) with teacher feedback? Where does the AI end and the teacher's expertise begin? Could there also be space for peer collaboration using the feedback given by AI? If it is the case, how would that be?

#### 5. Implementation

Considering our teaching context, how could the ideas presented be implemented? Think of a lesson and exchange ideas and tips on how you would do that.
